

AMENDMENTS TO THE SPECIFICATION

Please amend the 2nd full paragraph on page 6 of the application as follows:

It will be understood, that the user of the envelope 10 will grasp a lower corner 34 of the corner section 22 of the sealing flap 14 and pull upwardly to tear the corner section 22 away from the back panel 12 somewhat as shown in FIG. 8. Then the user of the envelope can insert a finger or tool into the envelope 10 between the sealing flap 14 and the front panel 28 and push the finger or tool against the fold line 26 or against the line of perforations 30 to open fully the envelope 10.

Please amend the 1st full paragraph on page 7 as follows:

The envelope 50 also has a fold line 62 between the sealing flap 54 and the ~~back panel 56~~ front panel and a line of perforations 64 at or adjacent the fold line 62 extending from a location adjacent one free side edge 66 of the sealing flap 54 to at least the corner section 52.
